TRUE PLAY

COPYSTAKE

ADMIN PANEL

GUIDE

About CopyStake

CopyStake is a Trueplay's live streaming feature that enables you to invite popular streamers and hold live gaming sessions right on your website.

It provides players with the opportunity to automatically replicate the streamer's bets, sharing all the wins and losses.
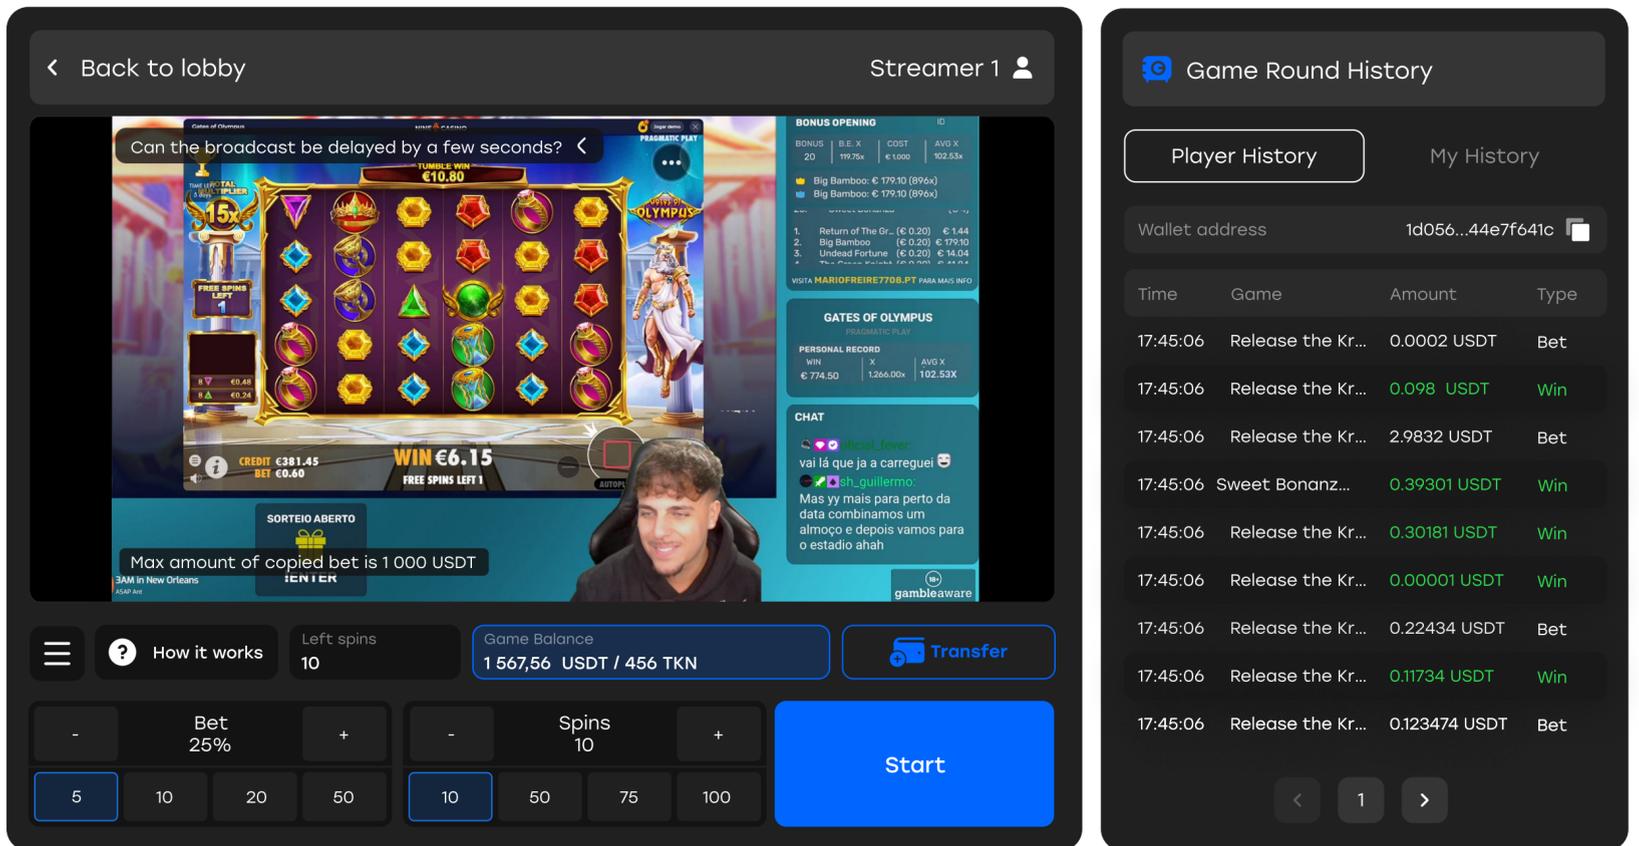

Additionally, collaboration with streamers can attract a larger audience to online casinos, increasing their visibility and potential customer base.

> You can work with the same streamers, but now they can integrate into your platform and interact with players in a new, trending way.
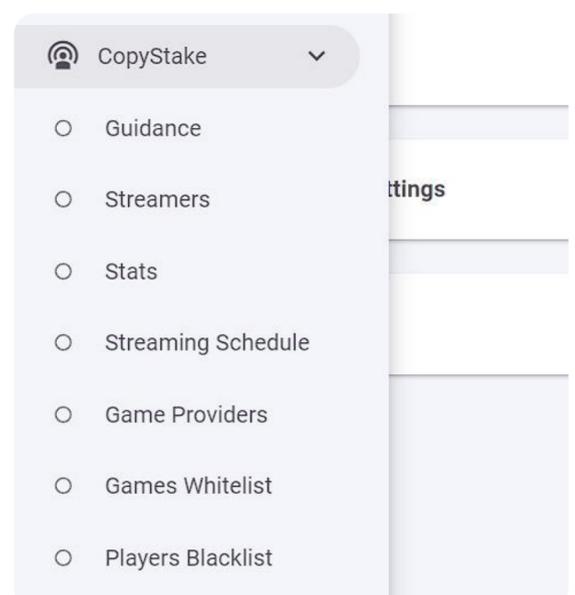

Introduction

You are about to elevate player engagement to new heights with livestreams! But there's one thing we need to do before running the first stream on the platform: learn how to use the CopyStake Admin panel.

CopyStake Menu Overview

Hover your mouse to the left side of the screen, and you'll see the vertical navigation bar.
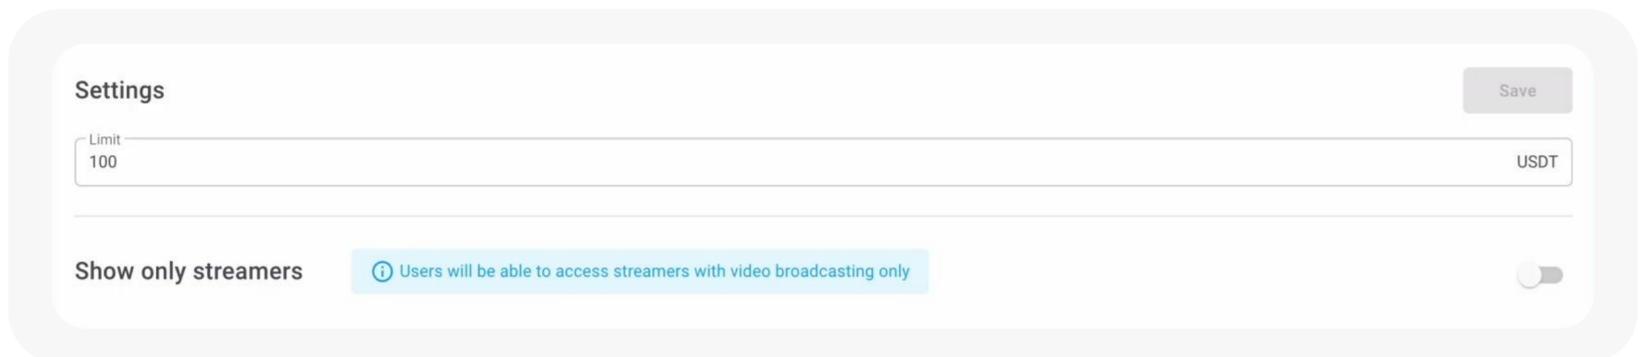

Click on the CopyStake title to open a dropdown menu with dedicated tabs. We'll focus on the ones you'll use most often: *Streamers, Stats, Streaming Schedule, Games Whitelist* and *Players Blacklist*.
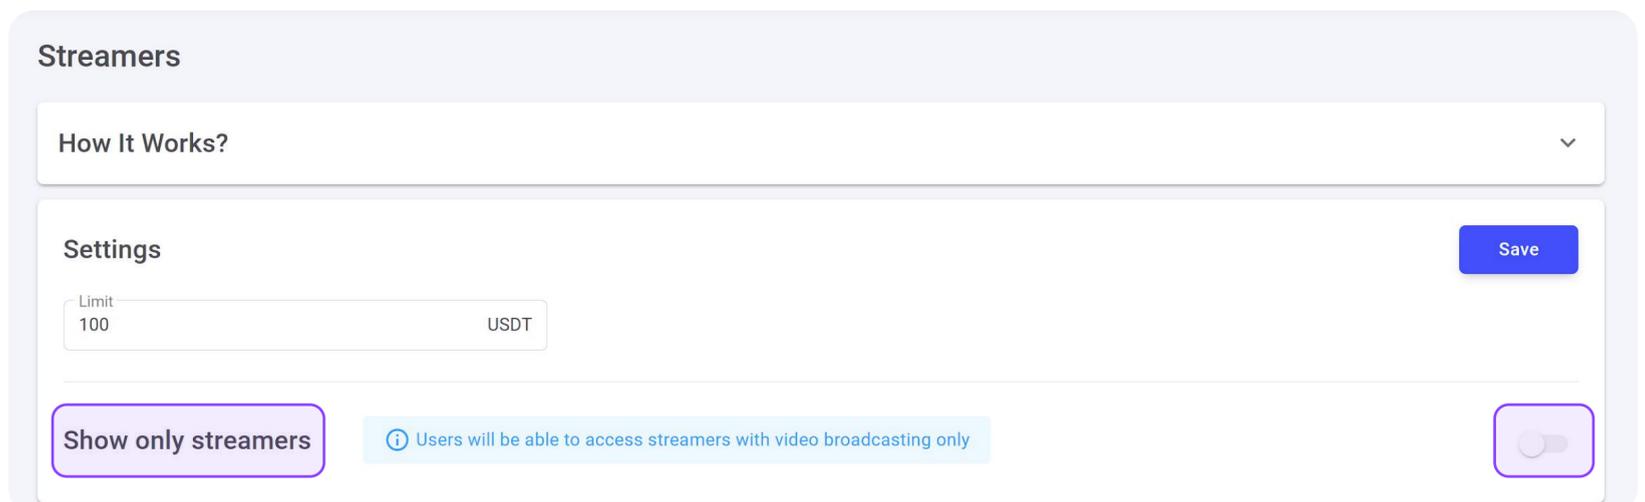

Streamers

Limit for a maximum bet

In the **Settings** submenu, you can set the limit for a maximum bet in **USDT**. The limit will be displayed on the broadcast page. Customers with a different currency will see the equivalent of the maximum bet in their currency, calculated based on the current exchange rate.

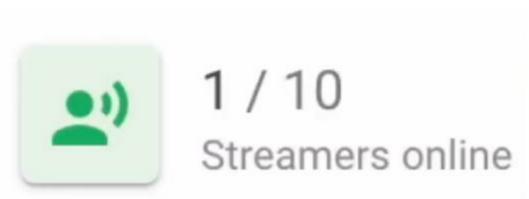

Show only streamers

Next, we have the **Show only streamers** toggle button. However, we recommend making regular players visible in the CopyStake Lobby to let them copy each other's bets, too.

Streamers online

The number on the left of the slash indicates how many streamers are currently live. The number following the slash represents the maximum number of streamers allowed to broadcast simultaneously based on your agreement with Trueplay.

Watchers online

You can also see how many people are watching CopyStake streams at the moment.

Streamer information and settings

The table provides detailed information about each streamer on your platform, including the date they were added, their wallet address, **user ID**, **nickname**, and **channel ID**, indicating if they are currently online or offline.

Manage Broadcast   ⬤ Play

With this control, you can permit a streamer to start broadcasts or restrict them from doing so in case they break a rule.

Manage Broadcast   WHIP

With this control, you can permit a streamer to start broadcasts or restrict them from doing so in case they break a rule.

Language   English

Here, you can specify the streamer's language.

Type   Public
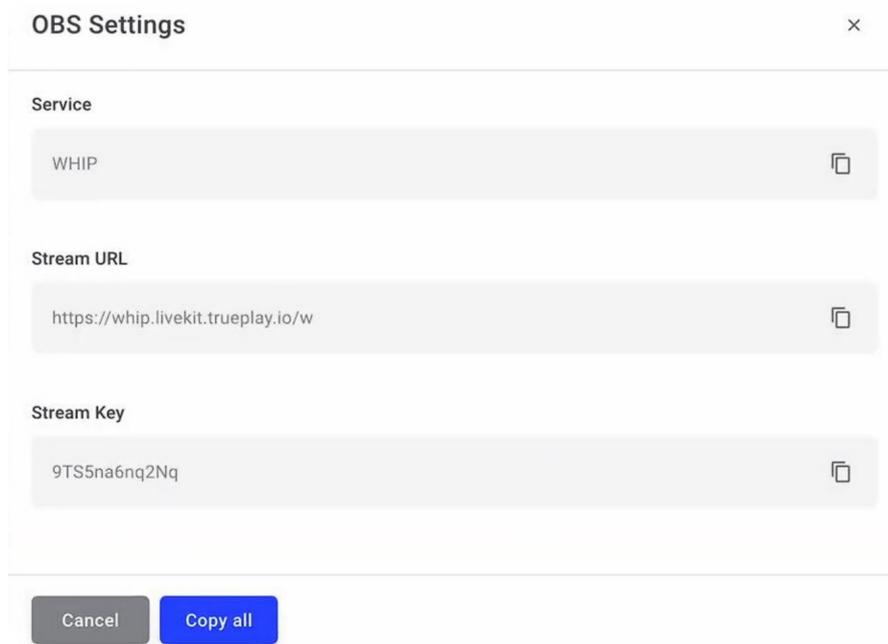

The column shows whether the channel a streamer works at is public or private, available only for users with an access code.

Thumbnail   🖼

We suggest you upload a cover for each streamer to make the CopyStake Lobby look as attractive as possible.

🟣 OBS settings

By clicking on the **OBS settings** icon, you open a window with information (**a protocol**, **a stream URL**, and **a stream key**) that streamers must insert into an OBS program to start going live.

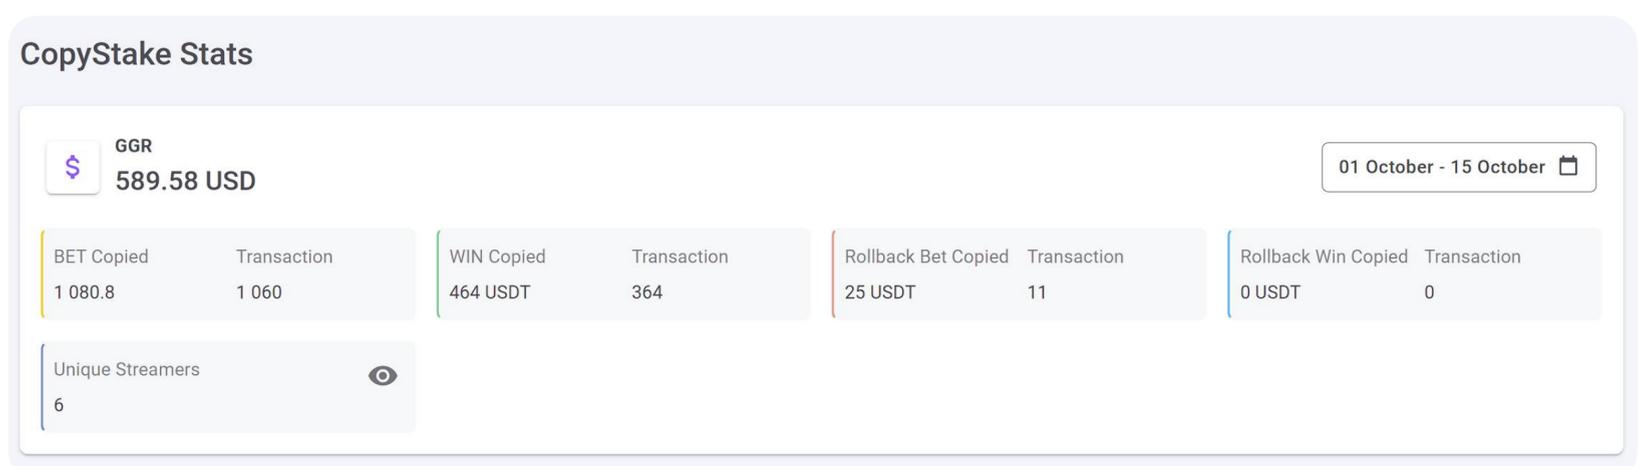

🗑 Removing a streamer from the list

Deleting a streamer from the list is done by hovering over the **garbage bin** icon and pressing it.

✏️ Editing information and settings

You can customize the above-mentioned details and settings by clicking on the edit icon.

Stats

**CopyStake Stats** shows your **GGR** for a specified period.

Streaming Schedule

You can specify when a streamer will be online. This information will appear in the Lobby.

Games Whitelist

This tab is designed for managing CopyStake-supported games.

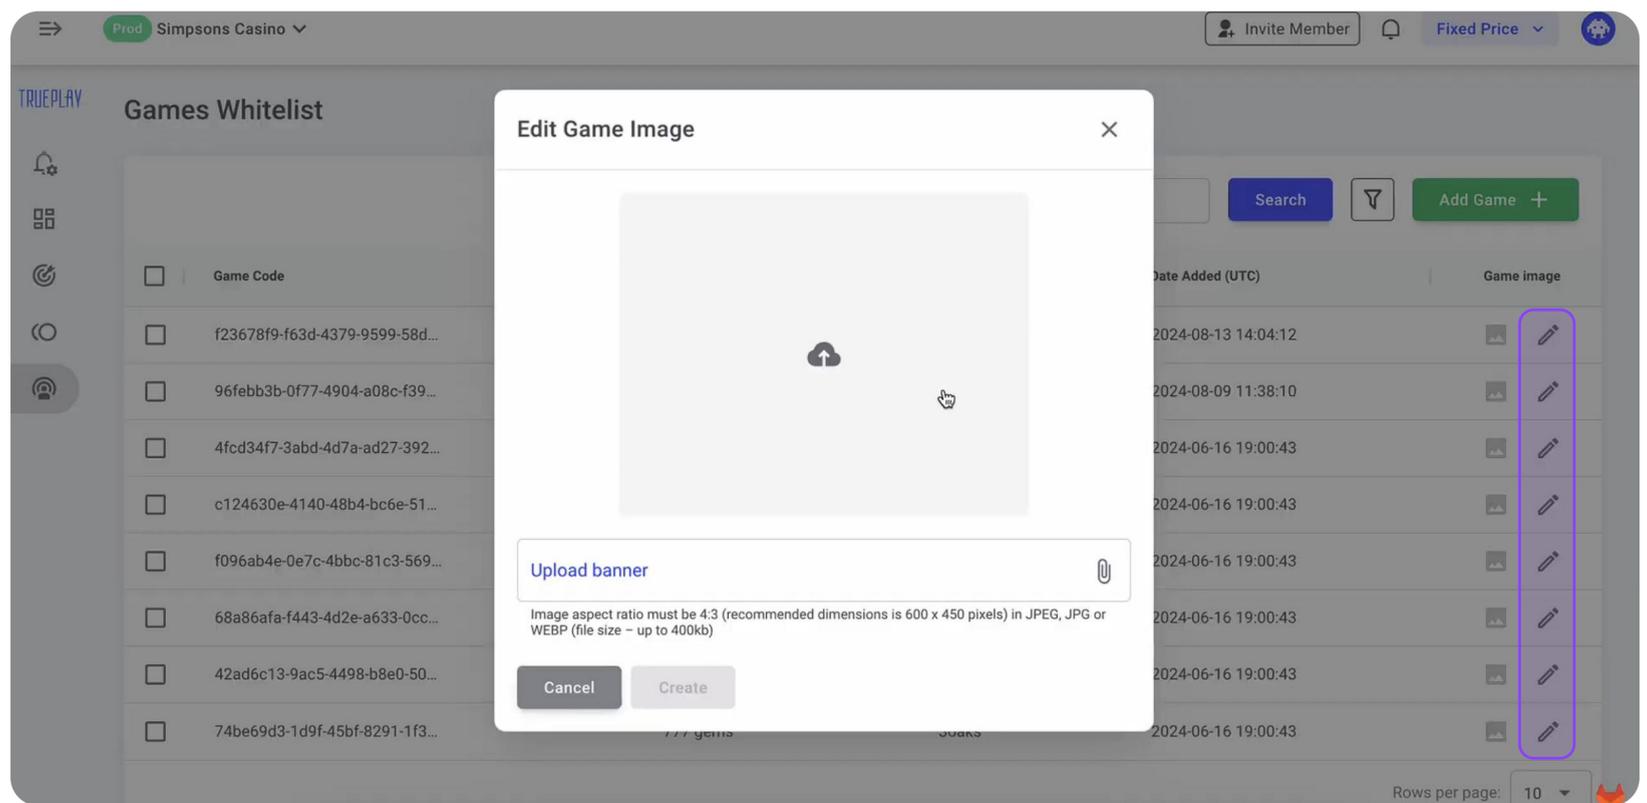

Adding a game

Click on the green **Add Game** button, enter the game's title in the search bar, select the game, and click the blue **Add 1 game** button at the bottom of the active window.
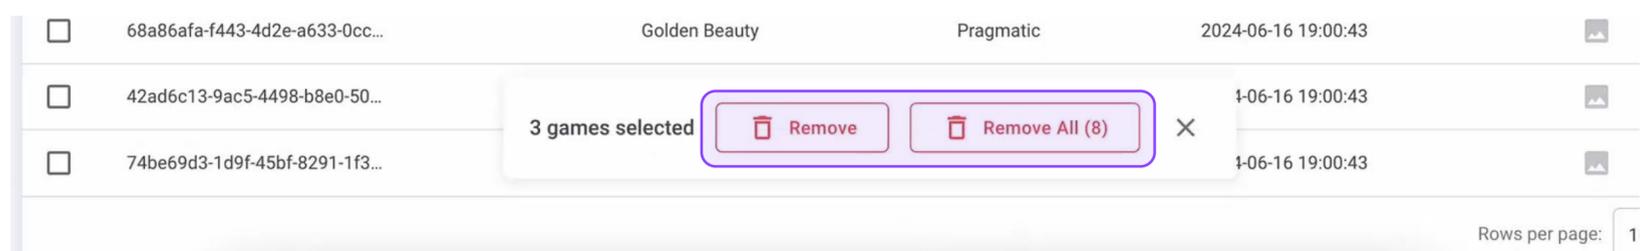

Adding game covers

Press the **edit icon** in the right corner of the page and upload a banner in the dedicated field in the window that appears.

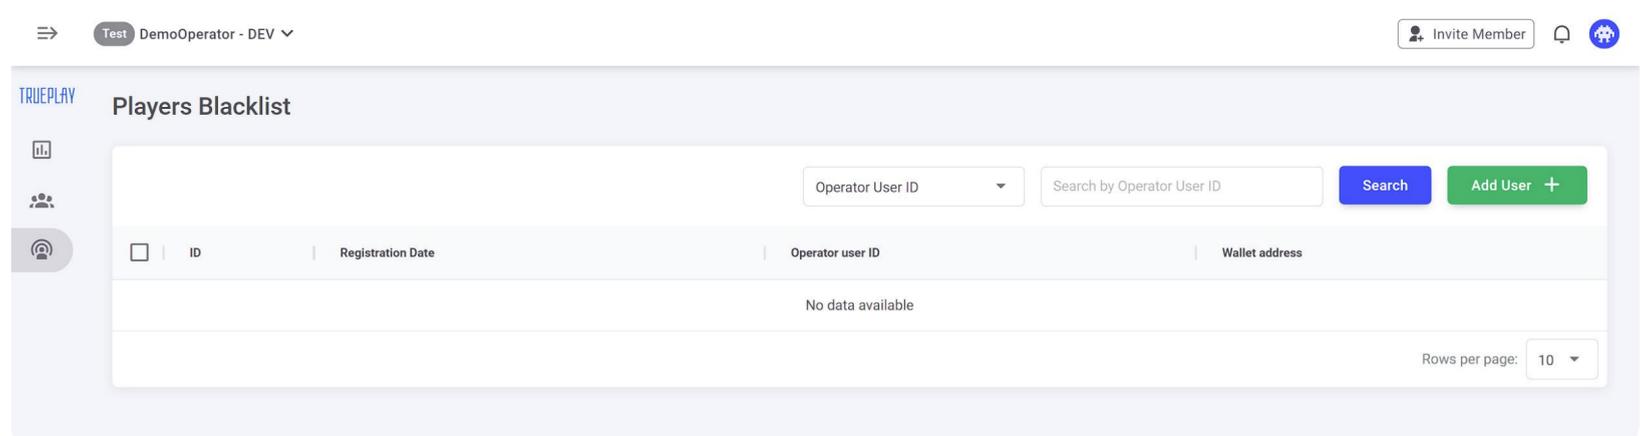

Removing a game

To delete a game, checkmark it and hit the **Remove** button.

Player Blacklist

Finally, there's a **Player Blacklist** to limit a particular user's access to CopyStake if you spot any fraudulent activities associated with their **user ID**.

Now that you have a good grasp of the basics, feel free to explore the Admin panel yourself. You're one step closer to disrupting the iGaming space!
